Relevant Experience

Product Design and Strategy

16 years

- Worked on a variety of products and platforms as a design director, creative director, UI/UX designer, and developer.
- Responsible for user testing features and managing how to transition feedback into feature enhancements.
- Worked with various team sizes where we have incorporated Scrum and the Agile Development process.

UI/UX Design

25 years

- Led the full design lifecycle for dozens of products, applications, and websites.
- Owned all facets of the creative process as well as selling visions to stakeholders.
- Responsible for conducting user tests and the design evolution based on feedback.

Frontend Development

25 years

- Owned the end-to-end development responsibilities for dozens of products, websites, and applications.
- Evolved my skillset over the years to include a variety of frontend development languages including HTML, CSS (including SASS, Tailwind), Javascript libraries (React / Vue / Angular), PHP (Wordpress), to name a few.
- Worked on large development teams to build robust products while utilizing platforms like Jira / Confluence, Github, Slack, and Trello to manage workloads and responsibilities.

React / Vue / Angular

11 years

- Developed these languages to better inform design decisions and to adapt to the latest frontend technology for progressive web applications.
- Owned the full development duties for creating and deploying web applications built around these technologies.
- Worked on development teams to share the roles and responsibilities of mature products and applications.

Graphic Design and Branding

23 years

- Responsible for creating custom logos and brands and managing all stakeholder feedback and revisions.
- Designed, implemented, and enforced organizational brand and style guides for large companies.
- Authored design and UX methodologies to aid in the development and creative direction of products and application

Wireframing, Prototyping, and Visioning

14 years

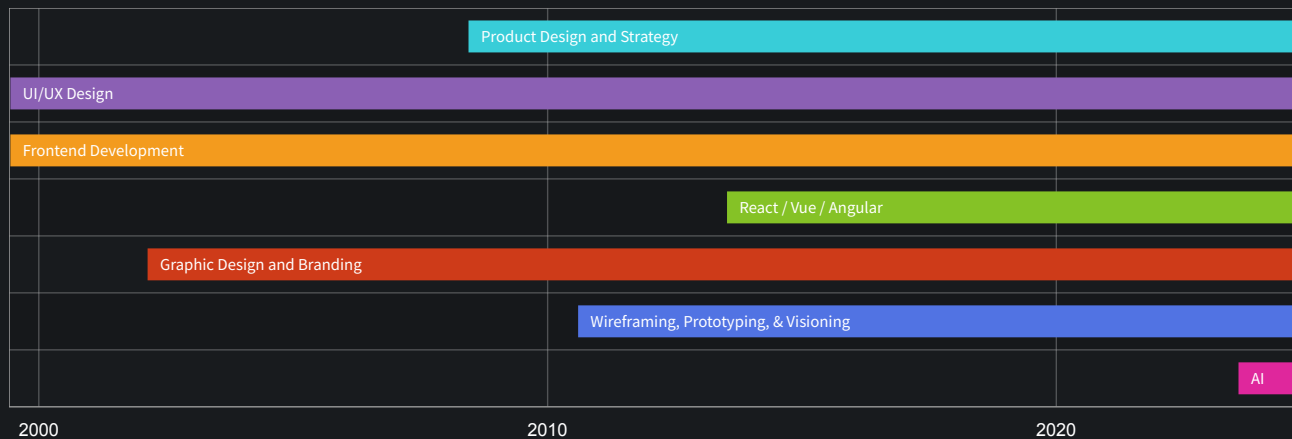

- Responsible for the creative vision and direction of an entire line of products and applications.
- Utilized tools like Figma, Sketch, Photoshop, and Illustrator to facilitate user testing and selling vision to stakeholder:
- Created live-code prototypes to more fully user test concepts and detailed interactions and for better hand-off to development teams.

Artificial Intelligence

a year

- Leveraging Midjourney and Stable Diffusion for custom, AI-driven imagery and design assets.
- Experimenting with Gemini AI models + API for in-app dynamic content.
- Utilizing OpenAI solutions for content + asset generation, efficiency, and troubleshooting.

Timeline

Work History

Washington, DC

Today

Senior Product Design Manager

I lead the design team at Imagine Learning Classroom to build engaging and delightful experiences for K-12 students, teachers, and administrators.

- Manage a team of designers and act as an individual contributor for all features of our learning product.
- Collaborate with stakeholders, product managers, and executives, to align design strategies with overall business goals.
- Led the effort to establish personas, user testing strategy, and UXR functions to help validate product direction.
- Oversee the entire design process, from concept to implementation. Ensure that design solutions meet user needs, business requirements, and industry standards.
- Mentor and develop the skills of team members. Foster a culture of continuous learning and professional growth within the design team.
- Manage the allocation of resources, including budget and personnel, to ensure the team can meet project deadlines and objectives.
- Stay informed about UX design trends and best practices. Ensure that the team is creating user-friendly and intuitive product designs.
- Ensure that design deliverables meet quality standards. Conduct design reviews and assessments to identify areas for improvement.

NOV

2020

Alexandria, VA

NOV

2020
